

JYOTHIRMAYI TULLI

Peddapuram, Andhra Pradesh | +91-7993537455 | jyothirmayitulli19@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Computer Science undergraduate with strong problem-solving skills (400+ LeetCode, 1393 rating) and hands-on experience building event-driven backend systems using Node.js, RabbitMQ. Built microservices with asynchronous processing and REST APIs.

Professional Skills

- Languages: C++, Java, Python, JavaScript
- Backend: Node.js, Express.js, REST APIs
- Web: React.js, HTML, CSS, Tailwind CSS
- Database: MongoDB
- Core: Data Structures & Algorithms, OOP, DBMS, OS Basics
- Tools: Git, GitHub, VS Code

Education

B.Tech, Computer Science Engineering — Aditya University (Expected Jun 2027)
CGPA: 9.25
Diploma, Computer Maintenance Engineering — Aditya Polytechnic College (Jun 2024)
Score: 94.28%

Professional Experience

Full Stack Trainee(Frontend) – Technical Hub

December 2023 – May 2024

- Built responsive web interfaces using HTML5, CSS3, Bootstrap, and JavaScript with mobile-first design principles.

MERN Stack Internship – AIMS Technology

May 2025 – July 2025

- Developed a full-stack e-commerce application using React.js, Node.js, and MongoDB with user authentication and product management features. [GitHubLink](#)

Projects

Event-Driven User Activity Service -[GitHub](#)

- Designed an event-driven microservices system using Node.js and RabbitMQ to process 10+ events/sec, improving system decoupling and enabling asynchronous background processing.
- Designed REST APIs to capture real-time events and implemented message queuing for scalable background processing.

Advanced Code Editor- [Github](#)

- A browser-based code editor with VS Code-style keyboard shortcuts and real-time event debugging dashboard.
- Optimized editor responsiveness for smooth input handling and low-latency updates

Virtual Network Simulator-[Github](#)

- Built a Python-based virtual network simulation platform to model and test network topologies, node interactions, and traffic flows for educational and research purposes.
- Simulated multiple network scenarios to analyze routing behavior and data packet movement

Portfolio Website -[Github](#)

- Developed a fully responsive personal portfolio using Tailwind CSS with mobile-first design principles.
- Optimized layout and styling for cross-device compatibility and improved UI consistency

Ecommerce Catalog Project (Next.js)-[Github](#)

- E-Commerce Product Catalog A modern, full-stack e-commerce catalog built with Next.js, featuring server-side rendering, user authentication, and a fully functional shopping cart.

Coding Profiles

- LeetCode: 400+ problems solved | [jt_codes519](#) | Contest Rating: 1393
